# Color Guide™

## Dye Additive DS-R193

### Product Information

Revised 02/21/06

**Color Guide** a dissipating purple colorant to be added to the coating when manufactured. Color Guide will turn the coating purple making it easy to apply an even coat without missing spots.

Color Guide provides a temporary color contrast to the existing base coat during application. The colorant generally dissipates within 24 hours. Extra thick application, low light, low temperatures or high humidity may extend the rate of dissipation. Bright sun, hot and dry conditions may cause the color to dissipate much faster than normal.

**Color Guide - U.S. Patent 5,548,010**

**Color:** Purple

**Volume Solids:** 10.0% +/- .5%

**Shelf Life:** - 12 months stored indoors at 40 Deg. F. - 100 Deg. F.

**Flash Point:** 280 degrees F.

**Net Weight per Gallon:** 8.86lbs. +/- .2 lb.

**Storage Temperature:** 35 Deg F. - 110 Deg. F.

**Packaging:** Packet for one gallons kits
